EXPERIENCE

Oasis Infobyte

Web Development and Designing Intern | 2026

Web Development & Designing

- Built responsive web pages using HTML, CSS and JavaScript, including a personal profile page and landing page.
- Applied frontend design principles and used Git/GitHub to organize project development.

PROJECTS

Movie Recommendation System | Python | Flask | OMDB API | HTML | CSS

Built a Flask-based movie recommendation system using the OMDB API for search and genre-based discovery.

- Integrated API data with a responsive web interface.

Online Recruitment Fraud Detection | Python | Deep Learning | HTML | CSS

Developed a deep-learning system to detect fraudulent recruitment postings using text analysis.

- Explored Logistic Regression, Random Forest, CNN and LSTM; evaluated models using accuracy, precision, recall and F1-score.

Student Behavior Change Prediction | Python | HTML | CSS

Built a Python-based system to identify student behavior patterns from multimodal learning data.

E-Commerce Store Website | HTML | CSS | JavaScript

Created a responsive shopping interface with product filtering and cart functionality.

Personal Portfolio Website | HTML | CSS | JavaScript

Developed a responsive portfolio website to showcase projects, skills and contact information.
